What those terms mean

Feature	Description
Lyrics	SongSelect has the song words for the top songs sung in churches.
Sound samples	30-second sound clips, to help you get a feel for the song, or choose between similar songs.
Chord charts	The chords for playing with guitars and other instruments.
Lead sheets	The song melody line, which can be played in the player, and also transposed.
Hymn sheets	4-part harmony (also known as SATB) arrangement. All four parts, or any of the individual parts, can be played in the music player. That is helpful for getting to know the song parts. And the hymn sheet can be transposed into another key.

IMPORTANT: SongSelect is only available to current Church Copyright Licence Holders.
